ROLES AND RESPONSIBILITIES

SOMEONE GET ME THE JOHNSON FILE RIGHT AWAY!

YES SIR...UHH... COMING RIGHT UP

NO PROBLEM SIR, I HAVE IT RIGHT HERE ON DISC 5!
RECORDS MANAGER: ROLES AND RESPONSIBILITIES

LIFE CYCLE OF RECORDS

- Birth: Creation, receipt, or computer generation of records and information.
- Early in Life Cycle: Appraisal of values to determine retention requirements.
- Active Stage: Organization, handling, and maintenance of information for immediate purposes.
- Semi-Active or Inactive Stage: Storage of files at specific locations for occasional access.
- Disposition / Archival Stage: Either destruction of records, or transfer to Archives, for permanent preservation and memory for the next generation.

RECORDS MANAGER:

RECORDS MANAGER: RESPONSIBILITIES

- Records and Information Management Planning
- Collection, Creation, Receipt and Capture
- Records & Information Lifecycle Management
- Organization
- Use and Dissemination
- Maintenance, Protection & Preservation
- Disposition
- Compliance/Audit/Improvement
RECORDS MANAGER: RESPONSIBILITIES

8 main responsibilities for Records Manager:

• Accountability
• Integrity
• Protection
• Compliance
• Availability
• Retention
• Disposition
• Transparency
RECORDS MANAGER: RESPONSIBILITIES

1) Accountability
   • Making sure the organization adopts policies and procedures to guide personnel
   • Developing records management program
   • Assigning defined roles and responsibilities to different staff
   • Documenting program policies and procedures
   • Auditing the process
   • Identifying areas for improvement

2) Integrity
   • Correctness of and adherence to the organization’s policies and procedures
   • Reliability of the information management and governance training and direction given to the employees who interact with all systems
   • Reliability of the records and information created
   • An acceptable audit trail
   • Reliability of the systems that control information, including hardware, software, and infrastructure
RECORDS MANAGER: RESPONSIBILITIES

3) Protection
   • Constructing a reasonable level of protection to records (i.e. private, confidential, privileged, secret or classified)
   • Ensuring the availability of critical records during or after crisis
   • Applying protection control (security, access control, storage, declassification, from creation to disposition)

4) Compliance
   • Complying with applicable laws and other binding authorities, as well as with organization policies (Official Secret Act, Freedom of Information Act, National Archives Act etc)
   • Organization policies, codes of conduct, ethic rules etc
   • Adopting and enforcing suitable policies
RECORDS MANAGER: RESPONSIBILITIES

5) Availability
   • Maintaining records in a manner that ensures timely, efficient and accurate retrieval of needed information
   • Providing the right records to the right person at the right time (3R)
   • Organizing efficient and intuitive set of methods (clear access and retrieval policy/system)
   • Protecting valuable records from being lost, corrupted or stolen

6) Retention
   • Maintaining records for appropriate time (cost effective, storage, maintenance)
   • Developing records retention schedule (what information to retain, how long to maintain, how to dispose – based on records life cycle)
   • Based on 4 aspects:
     i. Legal and regulatory (local, national and international)
     ii. Fiscal (financial, audits and tax)
     iii. Operational (business needs and operational value)
     iv. Historical (depict the history of organization)
RECORDS MANAGER: RESPONSIBILITIES

7) Disposition
   • Providing secure and appropriate records disposition
   • Ensuring it is transported securely, destroyed completely and irreversibly
   • Transferring records to historical archives
   • Documenting disposition process

8) Transparency
   • All business processes and activities shall be documented in an open and verifiable manner
   • Available to all personnel and appropriate interested parties
   • Clear procedures to control access to information
Electronic Records
“Electronic records pose the biggest challenge ever to record keeping in the Federal Government and elsewhere. There is no option to finding answers, the alternative is irretrievable information, unverifiable documentation, diminished government accountability, and lost history” - John W. Carlin, 8th Archivist of the United States, 1995 - 2005

Transformation from conventional record keeping (paper based) to electronic record keeping

Critical success factors:
• Participation from top and senior management
• Good records management program
• Good agency business practices
• Reliable information technology infrastructures

RECORDS MANAGER: ISSUES & CHALLENGES

2) Career Development
• “Passion is the difference between having a job and having a career” – Anonymous
• Differences career path between Public and Private Sector
• Membership of professional organizations
• Formal training and continuing education
Freedom of Information (FOI)

“Access to public records gives citizens the opportunity to participate in public life, help set priorities, and hold their governments accountable. A free flow of information can be an important tool for building trust between a government and its citizens. It also improves communication within government to make the public administration more efficient and more effective in delivering services to its constituency. But, perhaps most importantly, access to information is a fundamental human right and can be used to help people exercise other critical human rights, such as clean water, healthcare, and education. Access to information has been more recently recognized as an instrument that can be utilized to fight poverty in developing nations.”

**RECORDS MANAGER: ISSUES & CHALLENGES**

- To confers a **general right of access**, on request, information held by public authorities.
- Number of exemption such as security matters, trade agreement, personal data, health records
- Selected countries implementing FOI:
  - USA – 1967
  - Australia – 1982
  - United Kingdom – 2005
  - India – 2005
  - Bangladesh – 2009
  - Malaysia – 2011 (State enactment)
ISO15489-1:2001 Clause 7.2,

1. The authenticity and integrity of records need to be **guaranteed** over time, so that users can be **confident** that records are **genuine and trustworthy** and that no illicit alterations have been made to them.

2. Records need to be **usable**: they must be **accessible** to authorized users and provide sufficient evidence of the **context of their creation** to support user’s understanding of their significance. Records created within an organization should also be **reliable and accurate** in their content.
RECORDS MANAGER: CONCLUSION
